Please accept my thanks for the Lady Slipper Plants. I have planted them in leaf mold in a shady place and watered them down good. Here is hoping they will live and grow. They were so nice well rooted plants there is no reason why they should not. And those nice Lily Bulbs, such fat, sound bulbs I have never seen, especially the Coral Lily bulbs. I didn't even know they got so big as those you sent me. And all of them were a surprise to me, for size. If I only could have more of them. Thanking you again.

Yours truly,

Mrs. J. P.

Sirs:

Washington, D. C.

If you could see the sturdy growth from the plants you sent us early this spring you could better understand how much we prize your stock. Though it traveled four times the distance of other orders the plants arrived in perfect condition, and you paid the transportation. We have struggled with better known Nurseries because they were closer, but year after year we have been ordering from them and losing plant after plant and paying transportation—blaming ourselves—though not being able to tell why. Now we know, one tiny sprout limp in dry moss doesn't give us an even break to keep it alive. We greatly appreciate your generous orders.

Yours very truly,
F. H. S.

Spearfish, S. D.

Gentlemen:

I received my order from you some weeks ago, and the fine sturdy plants you sent me have already made a wonderful growth. I want to thank you for the extra things you included—they are doing well and are much appreciated.

Yours truly,
F. K. B.

HARDY PHLOX

Without the Hardy Phlox our gardens would surely be barren during July, August, and September when their brilliant colors overshadow all other perennials. Phlox can be used in masses in the perennial garden. Clumps among the shrubbery are very effective. They thrive best in a partly shaded location in soil that is deeply dug, well drained but moist. Phlox must never suffer for want of moisture as the root system is very shallow so that during prolonged dry spells water should be applied freely.

Our fields presented a glorious sight this summer and all who saw them exclaimed of the marvelous health and vigor maintained. You can rest assured if you plant our phlox plants you will receive the best that money can buy. We list only strong field grown plants.
